Professional Experience

InspHired Recruitment Solutions | Johannesburg

IT Intern | 2025 – Present

- Assisted with the installation, configuration, and maintenance of computer hardware and software across the organisation.

- Supported the development, deployment, and testing of mobile and web applications.

- Diagnosed and resolved hardware, software, and system-related IT issues.
- Collaborated with external IT service providers to support network operations and system upgrades.
- Contributed to software testing, documentation, and quality assurance processes.
- Helped maintain and optimise the IT infrastructure to ensure system reliability and performance.
- Assisted with workstation setup and provided day-to-day IT support to staff.
- Participated in the development of internal tools and applications.
- Delivered basic technical training and support to employees on hardware and software usage.
- Documented system configurations, network diagrams, and application details.
- Performed ad hoc IT and technical support tasks as required.

CodSoft | Remote

Python Developer Intern | 2024

- Contributed to three real-world software development projects, improving overall project efficiency by approximately 20%.
- Completed 100% of assigned tasks within deadlines, demonstrating strong time management and accountability.
- Implemented features and fixes that enhanced system performance and user experience for over 100 end-users.
- Utilised Python libraries such as NumPy to develop scalable and maintainable solutions, reducing runtime by 15–25%.

Independent Studios | Johannesburg

IT Generalist | 2022 – 2023

- Set up new devices, installed required software, and resolved day-to-day IT issues.
- Monitored and maintained cloud-based systems and services.
- Monitored network performance and troubleshot connectivity issues.
- Installed, configured, and maintained PCs and printers.
- Ensured software updates were applied, and licensing compliance was maintained. Implemented and monitored data backup processes.
- Tested and managed disaster recovery procedures.
- Applied system patches, antivirus updates, and endpoint protection measures.
- Managed company email systems and cloud storage solutions.
- Configured file-sharing and collaboration tools. Designed, developed, and maintained the company website.

AAA School of Advertising | Johannesburg

IT Support Intern | 2019

- Assisted students by diagnosing and resolving desktop-related technical issues.
- Supported the setup of new computers, including operating system installation and application configuration.
- Performed routine system updates and patches to maintain security and performance. Provided email-based technical support to users.
- Delivered Microsoft 365 support and troubleshooting assistance.
- Assisted with printer setup and support (Brother, Xerox, HP).

Projects

System Integration Loadshed

A Java-based REST API service providing South African place-name data, designed to demonstrate distributed systems and microservices concepts.

Key Features & Responsibilities:

- Processed and parsed a large CSV dataset containing over 59,000 South African place names.
- Filtered and structured data to focus on populated towns, organised by province.
- Developed REST API endpoints: - `GET /provinces` – Retrieve all provinces - `GET /towns/ {province}` – Retrieve towns by province
- Implemented configuration via files and command-line arguments, with a default server port of 7000.
- Designed a layered architecture including model, service, data, and API layers.

Technology Stack: Java 21, Maven, Javalin, Picocli, Jackson, JUnit 5, AssertJ, SLF4J

TrustCircle – Micro-Lending Platform

A peer-to-peer, referral-based micro-lending platform focused on accountability and trust.

Core Functionality:

- Referral-only user registration with unique referral codes.
- Accountability mechanisms for both referrers and borrowers.
- Short-term micro-loans ranging from R0 to R2,500 with flexible repayment terms.
- Integrated PayFast payment gateway for transactions.

Technology Stack:

- Frontend: React.js with Material-UI
- Backend: Node.js with Express
- Database: PostgreSQL
- Authentication: JWT
- File Uploads: Multer
- Email Notifications: Nodemailer
